EDUCATION

ABES Engineering College

Bachelor of Technology in Computer Science & Engineering

Ghaziabad, India

Nov. 2025 – Present

- **Performance:** SGPA 9.52/10.0 (SEM 1)
- Current Focus: Data Structures & Algorithms (Java), Object-Oriented Programming.
- Key Coursework: C++, Java Programming, Web Development Fundamentals.

TECHNICAL SKILLS

Languages: Java (Intermediate), JavaScript, C++, HTML/CSS

Cloud & AI: Google Gemini API, Generative AI, Vertex AI, Google Cloud Platform (GCP)

Developer Tools: Git, GitHub Actions, Chrome Extension API, VS Code, IntelliJ IDEA

Core Concepts: Data Structures & Algorithms (DSA), DOM Manipulation, Object Oriented Programming

CERTIFICATIONS & AWARDS

Oracle AI Certified Foundations Associate: Validated proficiency in AI/ML fundamentals.

Google Cloud Skills Boost (Public Profile): Earned Level 3 GenAI Badge & 10+ Skill Badges.

Develop GenAI Apps with Gemini: Certified by Google Cloud for building LLM-powered applications.

Prompt Design in Vertex AI: Mastered prompt engineering techniques for large language models.

EXPERIENCE & VIRTUAL PROGRAMS

Deloitte

Technology Job Simulation Participant

Remote

July 2026

- Engineered backend data normalization (ETL) logic in Python to convert unstructured JSON telemetry data into a unified database format, successfully passing automated unit tests.
- Drafted a comprehensive 120-hour software development proposal for a secure, geofenced intranet dashboard monitoring 36 industrial devices across multiple factories.

PROJECTS

Project Resonance (Accessibility Tool) | JavaScript, Gemini 1.5 API, Chrome APIs

Apr. 2026

- Developed an AI-powered Chrome Extension to bridge the digital culture gap for visually impaired users by dynamically reading aloud the context, vibe, and humor of internet memes.
- Engineered the core architecture using DOM manipulation and background service workers to intercept web elements and securely route data to the Google Gemini 1.5 Flash API.
- Competed at the MLH HackDays offline hackathon, successfully pitching the live product and securing a Top 33 placement out of 120+ participating teams.

Behance Homepage Clone | HTML5, CSS3, Flexbox/Grid

Feb. 2026

- Engineered a pixel-perfect replica of the Behance homepage using semantic HTML5 and advanced CSS.
- Implemented complex UI layouts using Flexbox and CSS Grid to ensure responsiveness and visual fidelity.
- Optimized frontend structure for maintainability, demonstrating strong grasp of Web Development fundamentals.

Java OOPs Game Suite | Java, Object-Oriented Programming

Jan. 2026

- Developed a modular suite of console-based games (Number Guessing, Rock-Paper-Scissors) using pure Java.
- Implemented core OOP principles including Inheritance and Encapsulation to manage game logic.
- Refined algorithmic logic for random number generation and user input validation.

EXTRACURRICULAR & HACKATHONS

HackDays Offline Hackathon (MLH): Reached Round 2 (Top 33 out of 120+ teams) at Galgotias College by building a live accessibility product. One of only two first-year teams to clear initial evaluations.

Major League Hacking (MLH): Participant in Global Hack Week; collaborated on open-source challenges.

Competitive Coding: Achieved **3-Star (Java)** & **2-Star (Problem Solving)** on [HackerRank](https://leetcode.com).

Coding Platforms: Active participant in CodeChef's "Clash of Coder" and HackerRank's "CodeWizard".
