Education

ABES Engineering College — Ghaziabad, India
Bachelor of Technology in Computer Science & Engineering — *Nov. 2025 – Present*

- **Academic Performance**: 9.13/10.00 CGPA (Ist Year).
- **Core Coursework**: Data Structures & Algorithms (Java), Object-Oriented Programming (C++/Java), Operating Systems Concepts, Discrete Mathematics.

Technical Skills

Languages: Java (Intermediate/OOP), JavaScript (ES6+), C++, HTML5, CSS3, SQL
Frameworks & Libraries: React 19, Vite, Tailwind CSS, DOM Manipulation, HTML5 Canvas API, REST APIs
Cloud & AI: Google Gemini 1.5 API, Vertex AI, Google Cloud Platform (GCP), Generative AI
Developer Tools: Git, GitHub Actions, Chrome Extension APIs, VS Code, IntelliJ IDEA, Overleaf
Core Concepts: Data Structures & Algorithms (220+ LeetCode), State Management, Responsive Systems Design

Experience & Community Leadership

Google Developer Groups (GDG) On Campus ABESEC — Ghaziabad, India
Core Contributor / Web Team — *2026 – Present*

- Contributed to the official web portal (gdgabesec.xyz), engineering performant frontend modules and workshop pipelines.
- Facilitated technical workshops and student onboarding initiatives to scale campus developer culture.

Technovation: The Networking Club — Ghaziabad, India
Technical Lead / Platform Contributor — *Aug. 2026 – Present*

- Co-engineered **DSAvation** (dsavation.vercel.app), a structured interview prep portal tracking 220+ curated LeetCode problems with analytics and live campus leaderboard for 200+ students.
- Coordinated club technical operations, algorithmic challenges, and peer-to-peer programming sessions.

Deloitte — Remote
Technology Job Simulation Participant — *July 2026*

- Engineered backend data normalization (ETL) logic in Python to convert unstructured JSON telemetry data into unified relational tables, passing automated unit tests.
- Drafted a comprehensive 120-hour software development proposal for an industrial device monitoring dashboard.

Projects

DSAvation (DSA Preparation Platform) | *React, Vite, Tailwind CSS, LeetCode Engine* — 2026

- Co-engineered a club-wide DSA learning platform curated with 220+ interview problems, video breakdowns, company tags, and daily challenges serving 200+ active students.
- Architected category filtering, dynamic progress tracking, and live campus leaderboard to foster peer competition.

GDG ABESEC Official Web Portal | *React, Vite, Tailwind CSS, Cloud Deployment* — 2026

- Contributed to the production web portal for Google Developer Groups on Campus ABESEC, managing hackathons, workshop schedules, and developer rosters.
- Architected accessible UI components with optimized asset delivery and responsive layouts across mobile and desktop.

Project Citadel (Vadanta OS Web Desktop) | *React 19, Tailwind CSS, Canvas API* — 2026

- Engineered an interactive cyberpunk web operating system featuring real-time terminal shell, custom draggable window manager, 4 canvas arcade engines, and integrated AI assistant proxy.

Project Resonance (Accessibility Tool) | *JavaScript, Gemini 1.5 Flash API, Chrome APIs* — Apr. 2026

- Developed an AI Chrome Extension for visually impaired users by dynamically reading aloud meme context and humor via background service workers and Google Gemini 1.5 Flash API.
- Pitched at MLH HackDays offline hackathon, securing Top 33 placement out of 120+ teams.

Certifications & Badges

Oracle AI Certified Foundations Associate: Validated proficiency in AI/ML fundamentals.
Google Cloud Skills Boost Profile: Earned Level 3 GenAI Badge & 10+ Google Cloud Skill Badges.
Develop GenAI Apps with Gemini & Prompt Design in Vertex AI: Google Cloud certified in LLM application design.

Extracurricular & Hackathons

MLH HackDays Offline Hackathon: Reached Round 2 (Top 33 out of 120+ teams) at Galgotias College as a first-year team.
Major League Hacking (MLH): Active participant in Global Hack Week; collaborated on open-source repositories.
Competitive Programming: 3-Star (Java) & 2-Star (Problem Solving) on HackerRank; active on LeetCode.
